Art Unit: 3641

1. Claims 9-10 and 12-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9, line 2; and in claim 12, line 2; the phrase "said exterior" lacks an antecedent. In claim 10, lines 1-2; and in claim 13, lines 1-2; it is not understood as to how the subsequently claimed claim language (claim 10, lines 3-9 and claim 13, lines 3-9) can be correctly described as constituting a "means for rotating". The sonar arrays 124, 144, and processing means 40 is more aptly described as a sensing and processing means.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 5, 7, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Dougan (266).

Dougan (266) discloses a weapon system comprising:

- |   |                              |
|---|------------------------------|
| a) a vehicle housing;                       | 25, 26                       |
| b) a first portion;                         | 25                           |
| c) a second portion;                        | 26                           |
| d) a gun system;                            | see fig. 14                  |
| e) a gun;                                   | 30                           |
| f) a waterproof housing;                    | page 3, lines 1-40; claim 15 |
| g) a gun muzzle extending from the housing; | see fig. 2                   |

- |   |                     |
|---|---------------------|
| h) means for rotating the gun;              | page 3, lines 66-75 |
| i) a fixed wing; and                        | 37                  |
| j) a plurality of movable control surfaces. | 38                  |

4. Claims 3-4, 6, and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 9-10 and 12-13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kearney II, Allensworth, Mollere, Lhuillier, and Taylor disclose state of the art weapon systems.
